

Software for MPT Modeling

During the workshop, we will perform practical exercises using different software packages for MPT modeling. Hence, it is necessary to bring a notebook, and to install the following software:

(1) multiTree

- <https://www.sowi.uni-mannheim.de/erdfelder/forschung/software/multitree/>

(2) R (version $\geq 3.6.0$)

- <http://cran.r-project.org/>

(3) RStudio

- <https://www.rstudio.com/products/rstudio/download/>

(4) JAGS (version ≥ 4.3)

- <https://sourceforge.net/projects/mcmc-jags/files/>

(5) The R package TreeBUGS

- Please open the file `install_TreeBUGS.R` in RStudio and follow the instructions
